

Dynamic Support Systems Newsletter

December 2017

Power-Gen Las Vegas

Products and Services

- Hydraulic Snubbers
- Rigid Struts
- Dynamic Pipe Clamps
- Structural Attachments
- Calibrated test facility
- Site Surveys
- Bespoke Designs
- FEA Design

I attended the Power Gen exhibition in Las Vegas earlier this month. Lots of interest was shown in our products and new relationships were forged with colleagues in the industry. We look forward to further developments over the coming weeks.

We recently posted on our web site our intention to gain representation on a global basis, we are pleased with the response and will continue to explore more possibilities in the near future. If you feel you may be suited to this roll we would like to hear from you.

Quality and product development never sleeps within our company and we have been working hard in these areas since the last newsletter. More exciting innovations will be announced soon.

Over the past weeks we have secured further approvals from major organisations in the industry. We also have important approvals pending which we hope to secure in the near future.

Our office based in Scotland is becoming more active with our sales of survey projects which we identify as a growth opportunity for our company.

From everyone at DSS we wish all our suppliers and customers compliments of the season and a prosperous 2018.

Regards

Patrick
